Two MT streams: which one first?

Open the employer pages for two management trainee streams. In each column, pick one piece of work you would like to try and pair it with something you have done yourself. Then decide which stream to prepare for first.

Example I want to try improving how a queue moves. At a society stall I rearranged the helpers so visitors could enter in two lines.

Stream A

Stream name

Work I want to try

An example from my own experience

Source (employer and page name)

Date checked

Stream B

Stream name

Work I want to try

An example from my own experience

Source (employer and page name)

Date checked

My next step

Pick one thing and write down when you will do it.

I will first
